Color Hierarchy

How color layers stack — background → surface → content, and when to use onColor tokens.

Light Mode

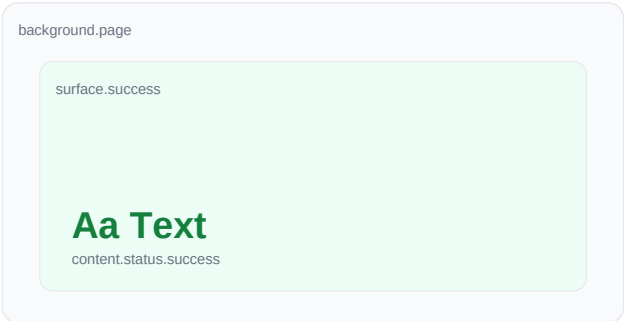

Standard Content

background → surface → content.primary

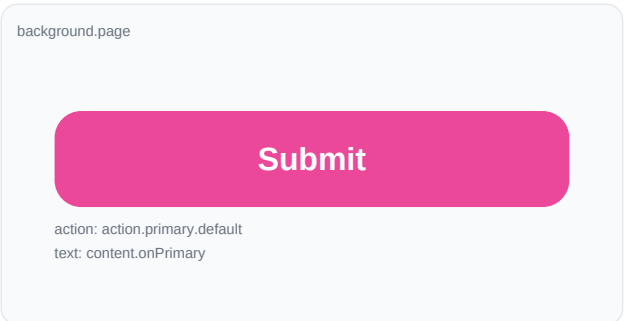

Status Surface

background → surface.success → content.status

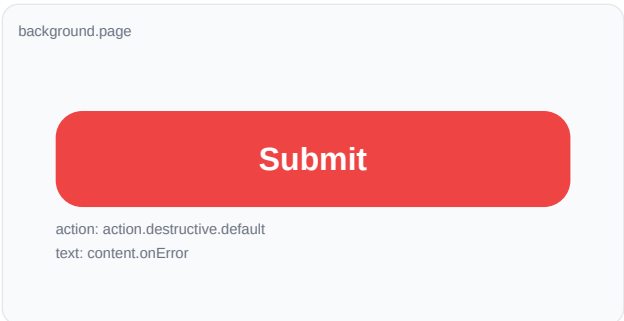

Action Button

action.primary → content.onPrimary

Destructive Button

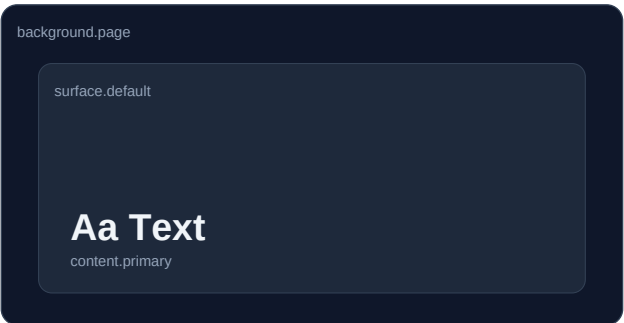

action.destructive → content.onError

Dark Mode

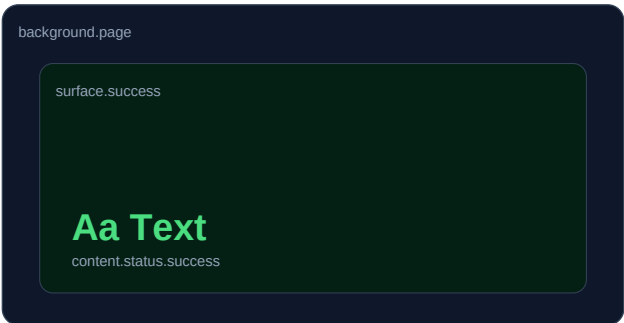

Standard Content

background → surface → content.primary

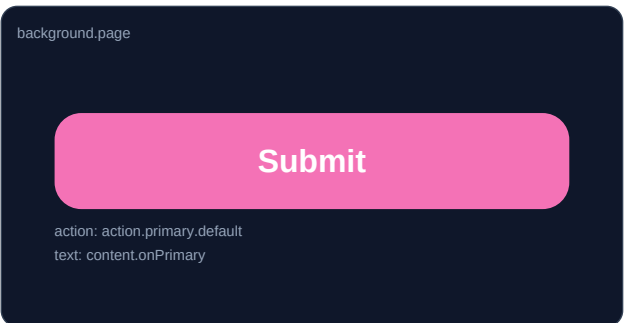

Status Surface

background → surface.success → content.status

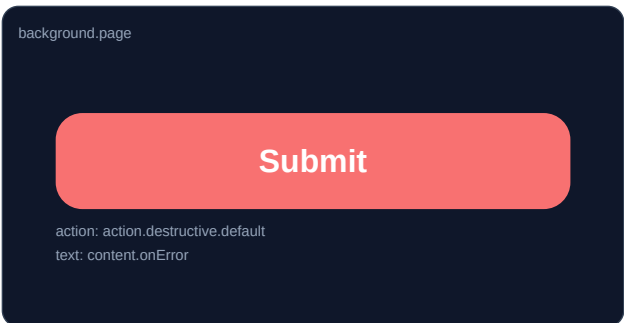

Action Button

action.primary → content.onPrimary

Destructive Button

action.destructive → content.onError
